Memorandum

To: File

Through: Allan Moore *AM*

From: Rocky Stonestreet *RS*

Date: June 20, 2011

Subject: Chevron Terminal in Roosevelt, Utah - Small Quantity Generator
Inspection - EPA ID # UTR 000010801

The purpose for this memorandum is to update the file known as Chevron Roosevelt Terminal EPA ID# 000010801.

The Chevron Roosevelt facility purchases crude oil at the well head (drill site) from various producers in the Uinta Basin. All crude oil purchases are transported by trucks to their Salt Lake Refinery. The facility contracts out its transportation service.

Chevron's old address was 1383 West Highway 40, Roosevelt, Utah. The inspectors verified on May 25, 2011 that a new business is presently occupying this address. The new business is called D&A Mcrae Transportation. They are a transporter of crude oil and they do not generate any hazardous waste. Therefore, the Chevron Roosevelt facility located at 1383 West Highway 40 is verified closed.

Chevron's new location is 1284 West Highway 40, Roosevelt, Utah. Based on an inspection of May 25, 2011, Chevron's new facility can be considered to be a conditionally exempt small quantity generator, as the facility does not generate any hazardous waste.

Also, based on the request of Chevron they would like to remain as a small quantity generator. Chevron has submitted a RCRA site identification form to provide subsequent notification of their new address change, and thus have been assigned a new EPA ID number. Their new EPA ID number is now **UTR 000011551**.
